

EMC Solutions Map to American Recovery and Reinvestment Act of 2009

EMC has the solid track record in the technology and services necessary to deliver advanced information infrastructures for state and local government of all sizes. We have the resources, the commitment, and the passion to ensure your jurisdiction receives all the benefits today's technology offers—and the framework you need for innovations to come.

EMC Shovel-Ready Solutions for ARRA

Green Solutions

EMC® Energy-Efficiency Solutions help today's data centers face critical energy issues: power and cooling limitations, high energy demands and costs, and even outages from overburdened power grids. EMC Energy Efficiency Solutions offer the advanced products, tools, and services you need to optimize energy efficiency in your data center.

• Symmetrix®	High-performance disk to appropriately manage and protect mission-critical data with a focus on energy efficiency and availability. Symmetrix is Common Criteria Certified.
• CLARiiON®	Affordable and easy-to-use networked storage which can grow with you. Perfect for consolidation and advanced data protection. CLARiiON is Common Criteria Certified.
• Centera®	Seamless access to archived information including e-mail, electronic documents and images, and call center records. Facilitate business compliance and regulatory needs with efficiency.
• Avamar®	This software uses data deduplication technology to identify redundant data to reduce backup time, growth of secondary storage, and network utilization. Perfect for secure backups of your VMware® environments, remote offices, and data center LANs.
• Captiva®	Transform business-critical paper, fax, and electronic data sources into business-ready content suitable for processing by enterprise applications.

Data Protection

Protect your critical data throughout its lifecycle and accelerate your business with advanced management and security solutions. EMC data protection products have built-in capabilities for access control, secure serviceability and communications, and auditing. You'll have a secure information infrastructure and the capabilities you need to ensure that your information remains an asset and never becomes a liability.

• RSA enVision®	Provides usable information from log data to ensure appropriate reporting and compliance. Useful for audit purposes.
• RSA Key Manager	Encrypt Personally Identifiable Information (PII) and appropriately manage the keys to the data.
• RSA SecurID®	Strong two-factor authentication to data for privileged users.
• RSA Data Loss Prevention	Prevent data leakage through policies to control the usage of the data.
• RSA Risk Advisor	Discover the data in your environment and assess risk with robust tools.

Content Management

Make your information count. Deploy an information infrastructure with enterprise-grade security, scalability, and reliability—and a common set of policies for all content assets across your agency. You'll mitigate risk without compromising your ability to harness opportunities.

• Process Suite	Realize greater operational efficiencies and employee productivity, while simultaneously gaining a better understanding of business performance in order to improve processes over time.
• Documentum®	Manage all types of content across the enterprise within a common information infrastructure. Share information, automate processes, and archive for historical reference and records retention.
• Captiva®	Transform business-critical paper, fax, and electronic data sources into business-ready content suitable for processing by enterprise applications.
• Document Sciences®	Maximize the citizen experience with dynamic, highly personalized communications, while reducing costs and accurately displaying information.
• Information Rights Management	Enable agencies to control, protect, and secure information that is shared both within the agency and with outside constituencies.

Physical Security

EMC Physical Security Solutions bring network security, information management and storage, video surveillance, and analysis to your enterprise or establishment. EMC's Physical Security Solutions enable you to manage, archive, protect, authenticate, and scale your security systems and video surveillance information more effectively, increasing your capacity to detect, deter, and analyze security events in real time.

• Intelligent Network Security	Review realtime video while receiving anomaly and policy-based alerts from software analysis of data.
• Surveillance Storage	Scale your security surveillance storage as your requirements grow, leveraging enterprise-class systems.
• Video Surveillance	Track the tiniest detail for your security needs with EMC's technologies and video surveillance cameras.
• Fixed Content Storage	Use security cameras to record events on EMC Centera Enterprise Evidence Vault capabilities.
• Advanced Analytics	Automate detection, alarms, investigation, and incident management.
