

## Information Infrastructure Solutions for the E&P industry

### The right choice for your information infrastructure

Efficiently and cost-effectively capture, archive, and leverage information throughout the entire E&P lifecycle—with an intelligent, flexible, and secure information infrastructure and proven offerings from market leaders.

Together, Schlumberger Information Solutions (SIS) and EMC® provide solutions—technologies, services, and best practice methodologies—that improve the performance of E&P operations by optimizing accessibility, reliability, and quality of technical data and information.

## Together SIS and EMC provide solutions that

- manage dramatic growth of upstream information and infrastructure complexity
- protect against information loss, secure against unauthorized use, and comply with legal and corporate mandates
- maximize effectiveness to reduce capital and operating costs and deliver required service levels
- create value by leveraging information in new ways and using your infrastructure to drive the business
- accelerate access to data
- increase collaboration capability
- create geospatial data catalogs for unstructured data
- deliver a data quality management process
- efficiently and cost-effectively store, manage, and protect your structured and unstructured data
- improve infrastructure flexibility and responsiveness.

### About SIS

Schlumberger Information Solutions offers a full range of information management and infrastructure solutions for the E&P domain. From data quality management with InnerLogix tools and geotagging of unstructured data with the unique MetaCarta® geographic search and referencing technology, through full IM solutions for information governance and business processes, protection, and management of project data and information access—SIS can provide the customized solution that meets your business needs.

SIS is an operating unit of Schlumberger that provides software, information management, IT infrastructure, and consulting services. SIS enables oil and gas companies to achieve breakthrough team performance, unlocking the potential of E&P teams to step-change their effectiveness and productivity. Through our technologies and services, oil and gas companies can drive business performance and realize the potential of the digital oil field.

### About EMC

EMC has been serving the oil and gas industry for over 25 years. Information is the most important asset of a business, and EMC provides the tools that can help you capitalize on your information. By bringing our systems, software, services, and solutions together, we can deliver a comprehensive information infrastructure for your business.

We help you design, build, and manage intelligent, flexible, and secure information infrastructures. These infrastructures are the versatile foundations upon which organizations can implement their information life-cycle strategies, secure their critical information assets, leverage their content for competitive advantage, automate their data center operations, reduce power and cooling costs, and much more.

With an information infrastructure, you can mitigate some of the inherent risk in your business, and reduce the significant costs associated with managing information while fully exploiting its value for business advantage.
