

# EMC Documentum ApplicationXtender for SAP

## Maximizing the value of your SAP R/3 investment

The EMC® Documentum® ApplicationXtender® suite provides immediate access to virtually any type of data file by integrating data generation, management, and access into a single comprehensive solution. EMC Documentum ApplicationXtender for SAP is an easy to install and configure interface connecting ApplicationXtender to SAP® R/3®. The combined solution provides SAP users with immediate and direct access to documents and other content they need to support critical business processes—improving efficiency and enabling organizations to get the most out of their investment in SAP.

### The Big Picture

- Increases efficiency and productivity by combining critical information resources
- Provides complete management capabilities to multiple information sources, including R/3 data
- Allows users to view documents and multiple document types via ApplicationXtender desktop or web clients from within the SAP interface

### Collect, organize, and deliver information with EMC Documentum ApplicationXtender

ApplicationXtender is a comprehensive data management solution that enables fast access to virtually any type of content by intelligently capturing, indexing, and storing business information.

- Supports a wide range of electronic content from scanned images to electronic documents, spreadsheets, X-rays, reports, e-mail, voice, and video files
- Provides complete management capabilities with check in/out, version control, revision control, and audit trail functionality, as well as annotation and redaction of document information
- Enables simple to complex business process management through fully integrated workflow module

### Maximize the value of your SAP R/3 investment with EMC Documentum ApplicationXtender for SAP

Linking ApplicationXtender with SAP R/3 provides a seamless bridge between the documents and data associated with many critical business processes, including financials, supply chain, and customer relations. ApplicationXtender for SAP provides R/3 users the ability to transparently access, manage, and view documents and other content—without requiring extensive customization or training.

ApplicationXtender for SAP:

- Eliminates manual linking of documents to work done within SAP
- Allows users to view documents and multiple document types via ApplicationXtender desktop or web clients from within the SAP interface
- Enables enterprises to use documents within any R/3 modules without additional development work
- Provides administrators with an integrated security model, so they only need to define and maintain security rights within one system
- Matches document linking frequency to business requirements
- Streamlines business processes involving both SAP and non-SAP users through integration with the EMC Documentum ApplicationXtender WorkflowXtender module

## Improve decision making quickly and easily

With ApplicationXtender for SAP, you tie all of your enterprise content to your R/3 system, providing users with immediate access to the information they need—improving productivity and maximizing the value of information for enterprise-wide decisions.

- Enables more informed and faster decision making
- Increases efficiency and productivity by combining critical information resources
- Provides immediate benefit and fast ROI through easy, quick deployment

ApplicationXtender for SAP consists of two components—the release script for SAP R/3 and the Data Upload Utility. The release script for SAP R/3 allows data to be shared between the applications. The Data Upload Utility polls the ApplicationXtender repository for new documents or other content. Through a scheduled or event-driven process, new content is identified, matched with a corresponding SAP R/3 business event, and linked to the appropriate process.
