

# EMC Documentum ApplicationXtender 6.0

## Instant document management solution that drives business results

### The Big Picture

- Easy-to-use Workflow Manager module with workflow samples, user-friendly Process Builder tool, and built-in reporting and forms support
- Simple-to-configure Retention Manager module that helps define document retention and disposition policies behind the scenes to meet business and compliance requirements
- Rapid deployment and easy administration
- Direct access to stored documents, reports, and information from virtually any Windows desktop application or Internet Explorer/Mozilla Firefox web browsers
- Ease of use enhancements and easy integration with existing business applications—without the need for additional programming
- Expanded application support for Microsoft XP Professional, Vista, Windows Server 2003/2008, and Microsoft .NET frameworks, including SQL 2008 and Adobe 9.0
- Fully internationalized and localized as a world-class global content management solution

EMC<sup>®</sup> Documentum<sup>®</sup> ApplicationXtender<sup>®</sup> 6.0 extends new and easy usability features to support a new class of document-based solutions. These enhancements include an easy-to-use Workflow Manager built on Microsoft .NET, providing a platform that easily integrates with existing business applications. A new Software Retention module with easy configuration tools enables automated set-up of regulatory compliance and retention policies.

Additional usability features and enhancements have been added to make working with a central content repository both seamless to the user and easier-to-use than any other departmental solution. These new enhancements enable organizations to improve business performance and reduce costs within and across functional business units.

### Easy to install, set up, and modify workflows

ApplicationXtender provides an add-on Workflow Manager module—an advanced workflow solutions process manager and analyzer. Workflow Manager offers complete capabilities for creating departmental and horizontal workflow solutions designed to improve efficiency in operational business processes. With features including out-of-the-box workflow samples, a user-friendly Process Builder, and built-in reporting and forms support, designing and managing business processes has never been easier. This easy add-on workflow management solution allows every business user to design, implement, and manage their processes without IT support. As a result, Workflow Manager enables organizations to improve business performance, reduce costs within and across functional business units, and raise productivity levels.

### Simple management of document retention and policies

ApplicationXtender provides an add-on module for managing the lifecycle of documents. It enables organizations to easily configure document retention and disposition policies behind the scenes to meet business and compliance requirements. Many organizations require the ability to control electronic content by preventing data theft and providing assurance that data has not been altered after it has been archived. The direct integration between ApplicationXtender and EMC Centera<sup>®</sup> enables you to apply automatic or manual retention capabilities such as holds, reporting, disposal, and audit trails to documents, and to utilize Centera-specific features for high-availability and disaster recovery, such as replication and failover. EMC Centera provides a simple, scalable, secure storage solution for cost-effective retention, protection, and disposition of a wide range of content.

### Easy access of business-ready content via SharePoint

With ApplicationXtender SharePoint integration, Microsoft SharePoint applications can provide complete visibility into the documents stored within ApplicationXtender content repositories. Web Parts controls provide a direct portal into ApplicationXtender content, including fully customizable queries and complete document lists based on query results. SharePoint users can leverage ApplicationXtender viewing tools to see the content directly in the SharePoint browser-based user interface. In addition to downloading these documents for local use, SharePoint users can view these documents within the browser, view thumbnails of multiple page documents, or zoom into specific areas of a single page.

With complete access to all ApplicationXtender documents, SharePoint users can leverage and quickly access all business-critical documents, no matter where they are stored.

### Seamless access to Microsoft Office Business Applications

ApplicationXtender for Microsoft Office 2007 simplifies the process of managing documents throughout an organization. Employees can more quickly access information stored in almost any type of documents, improving productivity and customer service. With flexible search capabilities, employees can find information quickly and with minimal effort. User familiarity with Microsoft applications reduces training time, providing greater efficiencies and raising the level of customer satisfaction service levels to business communities.

ApplicationXtender for Microsoft Office 2007 also streamlines deployment and updated procedures via its support of Microsoft ClickOnce technology, enabling one-click network installation. Microsoft ClickOnce provides a simple and easy way to initially installing the document management system and the same technology further helps organizations take full advantage of streamlining the deployment and update process. This type of deployment and automatic updating helps minimize human involvement in the version control process, greatly improving usability for employees and saving time and effort for IT departments.

### A world-class global content management solution

ApplicationXtender delivers a world-class global content management solution. The advanced workflow process manager and analyzer offers complete capabilities for creating fully internationalized departmental and horizontal workflow solutions. Support of simplified Chinese characters for localized implementations covers the ApplicationXtender desktop, web access, .NET, and administrator utilities. These capabilities include both full-text search and the ability to export directly from EMC Captiva® QuickScan™ Pro.
