

# Online Backup for Businesses

## Affordable, Easy-to-Use Backup for Multi-User Environments

### The Mozy Advantage

#### Reliability

You can enjoy peace of mind in knowing that your end user data is backed up utilizing the highest standards of reliability.

#### Scalability

While other backup providers are limited by storage constraints, Mozy can easily scale to accommodate millions of users.

#### Feature Rich, Intuitive

Not only will your IT department appreciate Mozy's robust set of features, your end users will appreciate the intuitive, simple-to-use interface as well.

### Professional Support

As a MozyPro customer, you'll have access to 24/7/365 email and phone support. When you suffer data loss, MozyPro's expert technicians will assist you with your questions and help you restore your data in no time.

## Mozy Online Backup - Simple, Automatic, Secure

The critical task of data backup can be an expensive and challenging endeavor for any organization. Fortunately, Mozy by Decho makes business-strength backup possible for Windows and Mac environments with an affordable, secure solution that seamlessly integrates into your existing infrastructure. Whether you're the CTO of a large organization, the office manager of a law firm, or an independent IT consultant, MozyPro is your business solution for remote data backup.

## With MozyPro, You'll Get The Tools You Need to Take Control

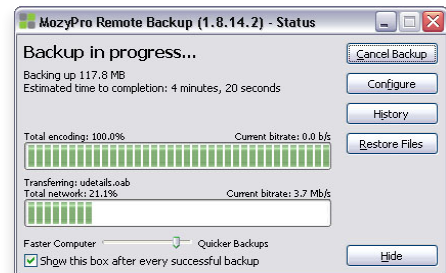

MozyPro's web-based Administrative Console allows you to:

- Create sub-administrators
- View individual or aggregate account usage, history, and stats
- Reset account passwords
- Change account status
- View and distribute license keys
- Customize individual and group configuration settings

Through the MozyPro software application users can:

- Select folders and files to back up
- Set automatic and scheduled backups
- See a history of all backups
- Configure options and set bandwidth throttling
- Restore files and folders

## World Class Data Centers

Your data deserves the highest protection available with the latest in technology. Mozy's data centers boast 24/7/365 onsite monitoring and security, state-of-the-art fire detection and suppression systems, and seismic safeguards that can withstand a 7.5 magnitude earthquake. Redundant power distribution units and diesel generators ensure that even in the worst of circumstances, your data is protected. All are backed with SAS70 Type I or Type II certification.

## Feature Set

MozyPro is packed with all the business-quality features you would expect from a full-service backup solution, including:

### Security

- **128-bit SSL encryption** — Safely secures your data during transport.
- **AES/Blowfish encryption** — Choose Mozy's encryption key using **448-bit Blowfish** encryption or manage your own key using military-grade **256-bit AES** encryption to secure your data during storage.
- **Near continuous data protection** — MozyPro automatically detects and backs up new and changed files.

### Performance

- **Automatic or scheduled backups** — Tell MozyPro when to perform your backups. Automatic is the simplest method in which backups are performed while your computer is not in use. Scheduled backups can be performed daily or weekly at a specified time of day.
- **Block-level incremental backups** — Saves bandwidth and ensures future backups are lightning fast.
- **Bandwidth throttling** — You can tell MozyPro to use more or less of your upload bandwidth so other higher priority services can run unimpeded.

### Ease of Use

- **Version (snapshot) support** — Restore file versions up to 30 days in the past.
- **SQL, Exchange, and network drive support** — Back up data residing on virtually any machine.
- **Windows and Mac support** — MozyPro supports Windows (2000, XP, 2003, and Vista, including servers) and Mac OS X (10.4 and 10.5, desktop and server) operating systems.
- **Open/locked file support** — MozyPro backs up all open and locked files, including Outlook PST files.

### User Simplicity

**Intuitive User Interface** – Mozy's easy-to-use interface was designed with the non-tech-savvy user in mind. It's as simple as selecting the files to back up, scheduling the times, and letting MozyPro do the rest.

**Standard or customizable backup sets** – Backup sets have been pre-built for the most common file types. By default, each of the pre-built backup sets that pertain to your files will be selected for backup. If the size of the selected backup sets exceeds your quota, you may deselect sets until you are under your quota. Advanced users may edit the pre-built backup sets or create their own.

**Status screen** – The status of your backup can be easily monitored by right-clicking on the Mozy icon in the system tray and selecting *Status*. The Mozy status screen also allows you to manually start your backup or launch the Mozy Configuration.

**Alerts** – Mozy can alert you when a backup has not performed in a specified number of days.

**Multiple restore options** – Restore data quickly either from a web interface or right from your computer. Or, for a fee, you can request a DVD restore delivered via FedEx.
