

# EMC Captiva QuickScan Pro for EMC Documentum ApplicationXtender

## The Big Picture

- Provides an easy-to-use, single workstation document capture solution for small and medium businesses
- Enables same day implementation, with point-and-click interfaces—ideal for organizations without large IT infrastructures
- Easily captures paper and automates the indexing process
- Stores digital copies of paper in a central repository
- Supports Windows Server 2003 and Microsoft .NET framework

Paper is the prevalent burden across nearly every industry. Small and medium-sized companies especially feel the impact of paper. An effective document capture and management strategy can tame the unorganized arrival of documents and provide the framework for an orderly workflow. As a result, paper is transformed to enhanced digital images that can be indexed and stored for easy retrieval and management.

For organizations that need to keep competitive with already taxed resources, EMC has paired two complementary solutions: EMC<sup>®</sup> Captiva<sup>®</sup> QuickScan<sup>™</sup> Pro and EMC Documentum<sup>®</sup> ApplicationXtender<sup>®</sup>.

## Capture with EMC Captiva QuickScan Pro

QuickScan Pro allows users to process documents more efficiently, and reduce or eliminate storage and filing costs associated with maintaining hard copy versions. QuickScan Pro streamlines the batch scanning process, using optical and zonal character recognition in addition to barcode detection. Compatible with more than 300 document scanners from leading industry manufacturers, QuickScan Pro can be installed quickly by end-users. Programmers can also take advantage of the fully-scalable capabilities of QuickScan Pro, customizing it as a front-end scanning module for almost any application.

## Document management made easy with EMC Documentum ApplicationXtender

With its out-of-the-box capabilities, EMC Documentum ApplicationXtender enables users to quickly create an “electronic file cabinet” for images captured with Captiva QuickScan Pro. Built on a central repository, ApplicationXtender provides specific capabilities for high-speed image capture and storage, and is designed for rapid deployment. With ApplicationXtender, businesses can quickly access business-critical documents from a universal desktop interface, enabling greater control over business documents, enhancing the quality of decisions, increasing customer service levels, and improving employee productivity.

## *Optimized for Microsoft Windows*

With an enhanced web architecture built on the Microsoft .NET framework, ApplicationXtender offers simplified web deployment and advanced functionality for managing paper invoices, statements, account records, and customer records.

---

---

It provides users with full access to the central repository and services through a desktop client or browser-based interface. Support for Windows Server 2003 enables ApplicationXtender to take full advantage of Windows NT and Active Directory services, offering access control, secure communications, verifiable transactions, and support for digital signatures.

## About EMC
