

EMC—KROLL ONTRACK

An EMC Select Partner Overview

ESSENTIALS

Partner products

- Ontrack PowerControls

EMC products

- EMC VNX Family
- EMC Centera
- EMC Replication Manager
- EMC Avamar
- EMC NetWorker

Solution highlights

- Complements various storage including EMC products
- Enables granular search and restore for Microsoft Exchange and SharePoint
- Complements backup and recovery technology including EMC products

ENABLING GRANULAR SEARCH AND RECOVERY IN MICROSOFT® EXCHANGE SERVER AND MICROSOFT® SHAREPOINT SERVER® ENVIRONMENTS

Ontrack® PowerControls™ software helps administrators search, recover, restore, and manage data efficiently in either Microsoft® Exchange Server or Microsoft Office SharePoint Server® environments. This robust software works in conjunction with backups such as EMC® Replication Manager, EMC Avamar®, and EMC NetWorker® and makes searching, recovering, and managing items at a granular level an easier and less expensive process.

REVERSE COMMON HUMAN ERROR

From a single deleted email or document to an entire mailbox or server, Ontrack PowerControls software is the go-to tool for reversing common human errors. Ontrack PowerControls software has granular message/document-level restore capabilities, enabling administrators to restore individual messages or documents, mailboxes/sites, attachments, notes, contacts and tasks/lists, libraries, and folders from a previous full disk or tape backup or from a snapshot such as Replication Manager provides.

MANAGE DATA

Ontrack PowerControls software is a secure and compatible tool suite that works with many storage products including EMC VNX® Family, and EMC Centera® to help you manage your organization's most important asset—its data. Ontrack PowerControls software does not change the contents or metadata of the Microsoft Exchange Server or Microsoft SharePoint Server source data and does not require any modifications to your current architecture or backup processes.

MAXIMIZE IT PERFORMANCE

Ontrack PowerControls software works directly with the existing enterprise environment including your existing backups, allowing for the extraction and restoration of only the items needed, providing an easier and less expensive process than maintaining a recovery server. Ontrack PowerControls software eliminates many of the processes associated with email and document recovery, restoration, and Microsoft Exchange Server and Microsoft SharePoint Server consolidation and migration, maximizing your ability to serve your internal customers better and concentrate on your strategic IT initiatives.

With Ontrack PowerControls software, granular restoration (single message/document restoration) is feasible, so administrators can focus on more strategic initiatives, rather than restoring a full backup or performing a brick-level backup for one message or document.

CUSTOMER BENEFITS

- Restore individual messages, mailboxes, or entire EDB files from your Microsoft Exchange Server backups environment directly to a production Microsoft Exchange Server, another Microsoft Exchange Server, or to a file system.
- Restore individual items, lists, libraries, folders, entire sites, and site collections from your Microsoft SharePoint Server backups directly to a production Microsoft SharePoint Server, another Microsoft SharePoint Server, or to a file system.
- Find items meeting specific search criteria faster—even across multiple data sources—then copy and export those items to your desired location.
- Eliminate the need for a recovery server. Ontrack PowerControls software works directly with your backups and enables you to extract and restore only the items that you need.
- Keep your current production and backup processes intact. Ontrack PowerControls software requires no changes to your current processes and runs on popular Windows-based workstations and servers.
- Simplify server migration processes while allowing your IT resources to meet their daily email management requirements.
- Manage your users' complete set of mail items, including the Microsoft Exchange Server 2010 Personal Archive Mailbox and Recoverable Items features.
- Eliminate the need to have your new and old servers coexist simultaneously while migrating to Microsoft Exchange Server 2010. Save time and resources by fully automating the ability to copy legacy email to your new server using the Mailbox Creation Wizard.
- When Microsoft SharePoint sites need to be consolidated, Ontrack PowerControls software enables you to simply drag and drop an entire site into an alternate location.

ABOUT KROLL ONTRACK

Kroll Ontrack provides technology-driven services and software to help legal, corporate, and government entities as well as consumers manage, recover, search, analyze, produce and present data efficiently and cost-effectively. In addition to its award-winning suite of software, Kroll Ontrack provides data recovery, data destruction, electronic discovery, document review, and ESI consulting services.

ABOUT EMC

EMC is a global leader in enabling businesses and service providers to transform their operations and deliver IT as a service. Fundamental to this transformation is cloud computing. Through innovative products and services, EMC accelerates the journey to cloud computing, helping IT departments to store, manage, protect, and analyze their most valuable asset—information—in a more agile, trusted, and cost-efficient way.

CONTACT US
