UNIFIED IT OPERATIONS MANAGEMENT

Today, heterogeneous and dynamic IT environments are growing in complexity with the shift to cloud and DevOps. IT Ops must provide visibility to the health and performance of distributed, business-critical applications. At Vistara, we unify end-to-end lifecycle management for IT operations in a single platform built for modern IT. Vistara is the first SaaS solution to be validated by EMC Labs as a management solution for VSPEX. Vistara integrates with the individual elements of the VSPEX infrastructure, workloads and federated cloud services to provide a single pane of glass view for unified IT lifecycle management.

Simple VSPEX Management - Manage your environment with a single dashboard across both the physical and virtual elements of a VSPEX infrastructure solution from the bottom to the top of the stack.

Unified Cloud Management - Monitor and manage VSPEX private cloud, alongside public cloud and on-premise infrastructure to deliver federated cloud services.

Federated Service Management - Align infrastructure operations to business applications by monitoring and managing the health, availability, and performance of IT services that depend on distributed infrastructure elements.

VISTARA FOR VSPEX

Vistara Lifecycle Management is a comprehensive solution for managing the IT operations lifecycle—from monitoring, alert, and incident management, to proactive maintenance and optimization. The solution’s complete lifecycle management capabilities and easy-to-deploy SaaS architecture ensure a high level of adoption and quick time-to-value.
VSPEX converged infrastructure solutions provide simplicity, flexibility and choice. Vistara provides an easy to deploy and use, management solution to get the most value out of your VSPEX investment. Vistara can also provide the same IT operations lifecycle management capabilities across existing assets, like EMC storage devices and clouds.

**VISTARA FOR VNX AND VNXE**

Vistara Lifecycle Management also provides management for VNXe and VNX to deliver unified management of an enterprise’s infrastructure to provide a single pane of glass view for integrated IT lifecycle management. Vistara for VNX and VNXe capabilities include:

- Disk Monitoring
- Storage Pool Monitoring
- LUN Monitoring
- File System Monitoring
- Volume Utilization
- I/O Performance

**ABOUT VISTARA**

Vistara is an Advantage partner in the EMC Business Partner Program for Technology Connect. Vistara is a comprehensive SaaS solution that delivers end to end unified IT operations lifecycle management to manage, maintain and optimize your heterogeneous IT environment and align your infrastructure operations to business goals.
