How is your IT managed?

Whether it be increasing security or improving processes and workflows, a digital transformation can move your department and your business into the future.

DATA SECURITY

69%

Controllers transform operations and processes

78%

Transformers transform productivity on the go.

ENHANCE YOUR SECURITY

Data security is a critical, base-level implementation that can hinder productivity. 85% of Controllers are looking to implement or expand advanced security capabilities as part of their PC lifecycle solution.

INVEST IN PC MANAGEMENT

Management tools should streamline work, so that IT is focused on strategic tasks and not consumed by day-to-day operations. 55% of Controllers and Transformers want a partner with knowledge and expertise on how to achieve their business outcomes.

INCREASE PRODUCTIVITY

It’s a small but powerful step—they need to increase efficiency while aligning employees with the right tools to be productive. 56% of Controllers and Transformers agree that overall productivity at their enterprise has increased greatly due to IT.

Although Controllers and Transformers have differing objectives and goals in mind, they both use similar tools.

“Collaboration is not just about listening more—it’s about a partnership.”
