

## Rebrand and customize your solutions faster than ever. It's easy with the Dell yourID portal.

You've spent countless hours innovating, designing and building your solutions, so your brand should be front and center. From custom splash and setup screen logos to the BIOS and iDRAC settings, the easy-to-use Dell yourID portal allows you to customize your server and client platforms. And when it's time to update the BIOS, branding and custom settings are maintained, translating to a quicker turnaround and increased uptime for your end customers.

### Dell yourID portal

Simply enter your branding information and settings, review your customizations, and wait for your sample customized ID Module. Once you're satisfied, submit it. It's that easy.

### Express (basic branding customization)

- Custom BIOS splash screen
- Custom setup screen, iDRAC and Lifecycle Controller logos
- Custom product and manufacturer name
- Custom contact information
- Custom Microsoft system locked pre-installation (SLP) for OS activation

### Professional
