

# Meet the new Dell PowerEdge Rugged XR2

Rugged, ready and right along with you.

Wherever, whenever you need it, your data center is the lifeblood of your work. The Dell EMC OEM XR2 server, powered by the latest Intel® Xeon® SP processors, is with you every mile.

Take the temperature:

- Cold start down to -15C
- Up 45C with excursions up to 55C for 8 hours at a time

Packed with power:

- Up to 44 Intel®-based processing cores and 512GB of memory in a hardened short depth 1U footprint

Secure storage space:

- Up to 8 high capacity SSDs with over 30TB of storage capacity

Short depth:

- 20" Rack Depth

Shock and awesome:

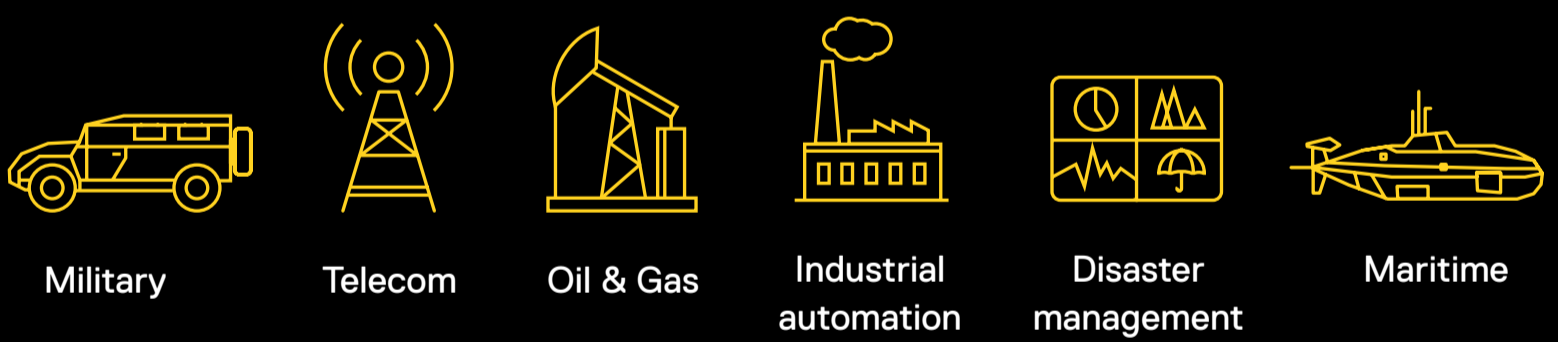

- Certified to 40G of Operational Shock with SSDs

Aim higher:

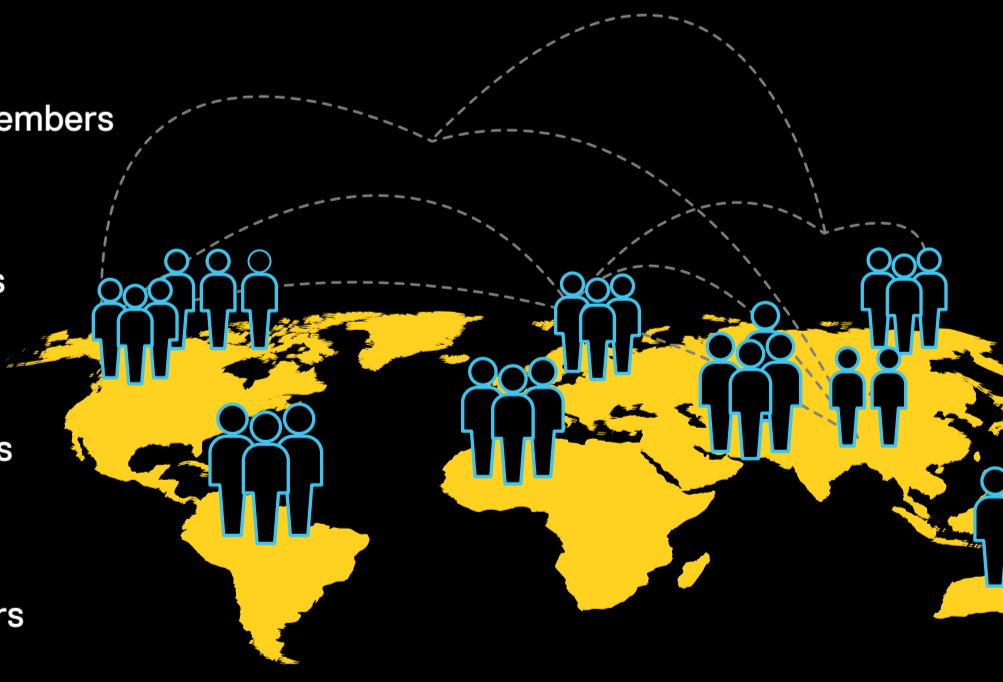

- Certified for operation at up to 15,000ft of elevation.

The toughest technology, for the world's toughest industries

Support that's with you, wherever you go:

- 40K+ team members
- 100+ countries
- 60+ support centers
- 7+ global command centers

Built from the ground up for harsh environments, the rackable compact size is agile and exceeds certifications in shock, vibration, dust, humidity, and EMI for both military and maritime. The de-branding and customization capabilities mean it's versatile. And with worldwide support and world-class supply chain excellence, whoever you are and wherever you go, you can take rugged with you.
