EDUCATION: SCHOOLS

STEM LABS
Students in computer and STEM (Science, Technology, Engineering, and Math) labs require powerful, affordable desktop PCs to run specialty applications, like design or CAD software.

INTERACTIVE LEARNING SPACES
In interactive learning spaces, students can create, problem solve and collaborate while using digital tools and resources provided by PC systems.

INTERACTIVE CLASSROOMS
Students participate in an engaging learning environment by collaborating with each other and sharing their work from a personal notebook to a large display located in front of the classroom.

DELL ProDeploy Plus

Deploy PCs with greater speed and less effort.

35% Reduce deployment time by up to 35%.

$620 Reduce deployment cost per PC by up to $620.

EXPERTS
Best practices acquired from years of experience yield unprecedented efficiency.

- Save up to 88% of the time it takes to create a cross-platform image
- Up to 35% faster deployments
- 46% less disruption to end-users

INSIGHTS
Gain insights from teams who do this every day.

- Over 11 million systems configured in the last fiscal year
- 54,600 units imaged globally every week
- Project documentation with knowledge transfer

EASE
Effortlessly deploy PCs by outsourcing to us. We can handle the tasks that divert your attention away from your highest priorities.

- Flexibility to select the level of service that matches your IT staff outsourcing needs
- Deployments can be performed after hours or on weekends
- Available in 70 countries

1Source: Based on May 2016 Principled Technologies Report commissioned by Dell EMC. Testing results extrapolated from a 10-system deployment to project time savings for larger deployment compared to in-house manual deployment. Actual results will vary.
