Healthcare

Healthcare Use Cases
HEALTHCARE

NURSING STATIONS
A decentralized nursing station increases a healthcare provider’s productivity and level of care by reducing walking time and increasing care time. Smaller nursing stations located in the ER provide close proximity to patients. Nurses and doctors can review data, order medicine, and monitor vital signs.

DOCTORS’ OFFICES / RECEPTIONISTS’ DESKS
Doctors can quickly access data, medical resources, and can share their diagnosis with patients and peers to determine the best method of treatment.

CLINIC ROOMS / PATIENTS’ ROOMS
For clinic rooms, location and ergonomics are essential to doctors who need face-to-face time with patients during a diagnosis. An on-site PC in patients’ rooms allows medical providers to quickly store and/or access patient information and provide accurate diagnoses and care.

PC CARTS
Staff can easily access and enter a patient’s treatment history in real-time, delivering the most accurate care.

**DELL ProDeploy Plus**

Deploy PCs with greater speed and less effort.

**35%** Reduce deployment time by up to 35%.

**$620** Reduce deployment cost per PC by up to $620.

**EXPERTS**

Best practices acquired from years of experience yield unprecedented efficiency.

- Save up to 88% of the time it takes to create a cross-platform image
- Up to 35% faster deployments
- 46% less disruption to end-users

**INSIGHTS**

Gain insights from teams who do this every day.

- Over 11 million systems configured in the last fiscal year
- 54,600 units imaged globally every week
- Project documentation with knowledge transfer

**EASE**

Effortlessly deploy PCs by outsourcing to us. We can handle the tasks that divert your attention away from your highest priorities.

- Flexibility to select the level of service that matches your IT staff outsourcing needs
- Deployments can be performed after hours or on weekends
- Available in 70 countries
