

New Mexico Department of Transportation

ONE TEAM, ONE VISION, ONE VOICE

“The NMDOT technical team, delivered 3 months ahead of schedule, an efficient and faster new system to our staff and better service to the public.”

Bruce Oakeley
Deputy CIO

PRODUCT

Documentum D2 and Retention Policy Services

ROI

Migrating 52M records saved the State money and better service to the taxpayers

PARTNER

Wave Technology

Migrating 52M records, from a legacy system, while automating Information Governance with EMC Documentum D2 and Retention Policy Services

Through a strategic deployment plan with highly technical staff, implemented in nine vs. twelve months, recognizing immediate value in the ECM solution with enhanced speed and usage.

Find out how NMDOT implemented a long-term records retention solution migrating off an old, legacy application

CHALLENGE

We had an aging legacy content management system for the entire department. The numbers were staggering and we had no retention period. We were seeking a system to integrate a web interface, adobe lifecycle and forms processing.

SOLUTION

Using Documentum D2 and Retention Policy Services to migrate and assign retention periods to content allowed a shared ECM solution to automate Information Governance. Migrating 52M records in nine months allowed IT to deliver better systems to the department's staff and better service to the public.

Implemented Faster

In nine versus twelve months with highly technical staff

Migrated records off legacy system

Fast and easy search and retrieval

Automated Information Governance

Records retention and disposition periods
