Certified Information Systems Security Professional (CISSP) Certification Boot Camp

Course Description

GET PREPPEFOR THE CISSP EXAM BY RSA’S SECURITY EXPERTS

RSA has developed an effective program to prepare candidates to become security practitioners and successfully pass the (ISC)^2 CISSP certification exam. This Certification Boot Camp involves intensive lectures, demonstrations, and review questions delivered by a security professional with years of experience as a practitioner. Not only will participants become prepared to take the exam but the anecdotes and real world examples from this course are invaluable insight into real world security challenges and approaches to solve them.

The modules of this course follow the 10 Domains of the (ISC)^2 Common Body of Knowledge. Each module presents the concepts and vocabulary from a technical and management aspect, bridging the gap that is often present in organizations today, a holistic approach to the technical, physical and administrative controls that make up a security program.

Each module is also followed by review questions, detailed explanations and exam tips related to the material and how it may be presented on the exam.

RSA’s CISSP Boot Camp has been updated to reflect the 2012 Domain Name and content changes. Participants will come away empowered for the exam and beyond.

2012 Common Body of Knowledge Domains

- Access Control
- Telecommunications and Network Security
- Information Security Governance & Risk Management
- Software Development Security
- Cryptography
- Security Architecture and Design
- Security Operations
- Business Continuity and Disaster Recovery
- Legal, Regulations, Investigations and Compliance
- Physical (Environmental) Security

Added Bonus Module: Security Insights from Senior Executives

RSA has a 30-year legacy of working with clients worldwide to deliver security solutions. In this module, we explore the security issues that senior executives from global organizations face as they enable their businesses and implement their security programs. This content is unique to RSA’s CISSP Curriculum and not available elsewhere.

RSA Education Services is not affiliated with ISC2 or its subsidiaries. Participation in this course does not guarantee the successful completion of the IS2CI CISSP Exam. RSA Education Services has developed the course content from direct experience in the areas of the Common Body of Knowledge and has used the ISC2 CISSP Candidate Information Bulletin as a reference as to technical depth and topics on the exam. Course costs do not include exam fees or facilitate exam registration. Exam schedules are available on ISC2.org.
