Get the most **BUSINESS VALUE** from your Converged Systems

Dell EMC Converged and Hyper-Converged Infrastructure help you streamline operations, cut costs and keep pace with today’s 24/7 on-demand business environment.

**Simpler IT means more innovation, less maintenance operations**

- 60% less IT time spent keeping the lights on.
- 90% reduction in unplanned downtime.
- 83% less staff time to complete business extensions.

**How can you get the most business value?**

**Think outside the box**

- Adopt a new approach to IT operations
- Re-organize in a way that’s focused on delivering holistic end-to-end services
- Prepare your team for new rules and skills

Implement an initial set of IT processes to more effectively manage service delivery

**Give the people what they want**

- #1 Gap in service strategy is providing and managing user requests through a service catalog and self-service portal
- 76% of organizations have no self-service portal or service catalog in place, or have an underdeveloped one.
- Make it easy for users to find, understand, and consume services...

*Start with an IaaS service catalog*

*Push in a self-service portal*

*Automate service approval routing and resource provisioning for faster consumption*
