Migrate to a proven, secured and scalable document repository while preserving your audit trail

DOCUMENTUM D2 LIFE SCIENCES SOLUTIONS OVERVIEW

Documentum D2 Life Sciences Solutions provide a proven, secured and scalable document repository with a modern and flexible client interface. Its information architecture is based on the industry standard DIA EDM and TMF Reference Model and the solution provides leading process support for Quality and Manufacturing, Research and Development, Clinical Trials and Regulatory Submissions.

Benefits include:

- Cost savings – no more FirstDoc maintenance fees and decreased employee training costs
- No custom coding required – replace customizations with configurations to enable easily upgrades
- Faster Deployment
- Greater consistency of ECM rules and policies with wider user adoption and simplified information management

For customers looking to transition to this new application platform, there are two major considerations: Solution Configuration and Data Migration.

SOLUTION CONFIGURATION

Our team has wide experience with FirstDoc and can help you define the optimal configuration for your future Life Sciences Solutions business platform, defining the future state of your system to ensure:

- Continuity of business critical data into the new UI and platform
- Coverage of all prior FirstDoc functionality on the new system
- Assistance to your organization on the change management required
- Knowledge Transfer to your team in train-the-trainer sessions
- Assistance creating training materials for the new system

MIGRATION

Our professional service consultants will prepare for the migration by:

- Creating a strategy for the migration and selecting the tools
- Planning the migration, identifying stake holders and dependencies
- Configuring our migration tools to perform the technical migration and transformations required to the new application model
- Executing the migration of production data as part of the go-live process

CONTACT US

To learn more about how EMC products, services, and solutions can help solve your business and IT challenges, contact your local EMC Solution Principal, Account Manager, email us at ContactECDServices@emc.com or visit us at www.EMC.com/Documentum.

Solution Configuration and Migration combine to ensure our customers experience a smooth transition to Documentum D2 Life Sciences Solution in terms of: well-managed change processes; user engagement and adoption; regulatory compliance for both configuration and migration; and a successful transition to a modern application platform.
