Residency Services for Converged Systems

Understanding and implementing best practices to maximize efficiency is key to success.

The force multiplier for your IT staff and data center

Business challenges
Dell EMC converged and hyper-converged infrastructure dramatically simplifies IT—enabling organizations to become more agile and decrease time to market. At the same time, agility must be balanced with budget constraints, the demand for improved productivity, and the need for specialized skill sets. Once your new converged infrastructure is in place, it’s critical that IT staff be able to take advantage of new features with little or no ramp time.

Understanding and implementing converged best practices to maximize efficiency is key to success. With any new technology, knowledge gaps can exist and need to be addressed. Let Dell EMC Residency Service for Converged Infrastructure Systems help.

Services overview
Dell EMC provides converged infrastructure experts to optimize configurations, processes and procedures, and share knowledge with your IT staff. Transition to your new converged platform capabilities quickly, while keeping your data center running at its peak. With total control of these experts’ priorities and time, you’ll have the flexibility to adjust resources and budget to your evolving business needs. Free your IT staff from the tactical to give them more time to innovate.

Every resident is backed by Dell EMC expert engineers, solution architects and implementation specialists—supplementing their own skills with an arsenal of proven tools, ITIL-aligned processes, and industry best practices.

Residents play an important role in the technology adoption lifecycle—with both long and short-term services available.

Key Benefits:
• Increase IT staff expertise with knowledge and best practices sharing from our converged infrastructure experts
• Accelerate technology adoption and maximize your converged infrastructure capabilities
• Optimize the operation and management of your data center
Residency Services for Converged Systems
