Today organizations operate under tremendous pressures to improve the customer experience while reducing costs and increasing efficiencies. The EMC® Document Sciences® xPression® software suite helps businesses address these challenges with a set of document design tools for developing personalized, regulated documents with speed and accuracy. EMC Document Sciences xDesign enables users to quickly design regulated document templates and easily add customization rules and personalization variables for producing documents on-demand or in high-volume batch. Using xDesign's intuitive design interface, you can comply with today's most stringent regulatory requirements, apply jurisdictions and effective dates, add and remove specific content, and include dynamic charts and graphs.

INTUITIVE DOCUMENT DESIGN CAPABILITIES
xDesign includes a set of powerful design tools that speed time-to-market by enabling the rapid creation of complex, regulatory document templates for policies, contracts, proposals, and correspondence. Its unique design environment offers a number of features that simplify the development process for business users and reduce the role of IT in developing and maintaining documents.

xDesign’s intuitive interface makes it easy to comply with the most stringent state regulatory requirements, apply jurisdiction and effective dates, add and remove specific content, and enables packaging of multiple documents based on Microsoft® Word or Adobe® InDesign® into correspondence packages that include regulatory and hierarchical logic.

The resulting regulated document templates are packaged for publishing with EMC Document Sciences xPression to fulfill on-demand requests and produce documents in high volume.

From accessing centrally controlled content to editing and tracking changes across multiple versions of regulated documents, xDesign enables you to produce more documents in less time than ever before.

KEY BENEFITS
• Leverage the familiar authoring environment of Microsoft Word to develop and maintain document templates without IT involvement.
• Use one tool to create and maintain complex regulated documents, including policies, contracts, and correspondence.
• Manipulate data and build document logic with easy-to-use point and click actions.
• Ensure the proper use of content and rules with comprehensive version controls and built-in business logic for effective dates, jurisdiction, and language.
• Include existing documents from Microsoft Word stored in a file system or ECM solutions, including page renumbering and table of content inclusion.

• Automatically route documents for review and approval with integrated multi-level workflow.

**NOW TAKE IT TO THE CLOUD**

For organizations seeking increased IT agility, lower total cost of ownership, and accelerated time to market, the xPression software suite is also available via EMC Managed Services OnDemand (EMC MSOD) as a private cloud-based, managed service. Built and maintained by EMC experts, EMC MSOD delivers optimal application performance while lowering TCO by as much as 30% to 60%. EMC MSOD leverages a highly optimized hardware and software stack and industry best practices, offering the highest level of security and providing the ability to customize applications to address your unique business challenges and integrate with your existing systems and applications. Organizations can accelerate time-to-value by eliminating IT infrastructure expenses, as well as delays in acquiring hardware and installing software, with EMC experts maintaining and optimizing system performance. EMC MSOD also offers backup and disaster recovery, support for multiple environments, including development, test, sandbox and production, a highly automated provisioning and monitoring infrastructure, and best-in-class security operations.
