

EMC ATMOS GEODRIVE

Instant Windows and Linux Cloud Access

ESSENTIALS

Instant Cloud Access

- Local drive or mount point
- Drag, drop files into cloud

No Development Required

- Microsoft or Linux PC/server
- Applications can use GeoDrive

Securely Store and Access Files in the Cloud

- Encryption
- Secure HTTP

No Charge for Licensed Atmos Customers

CLOUD ACCESS FROM YOUR DESKTOP

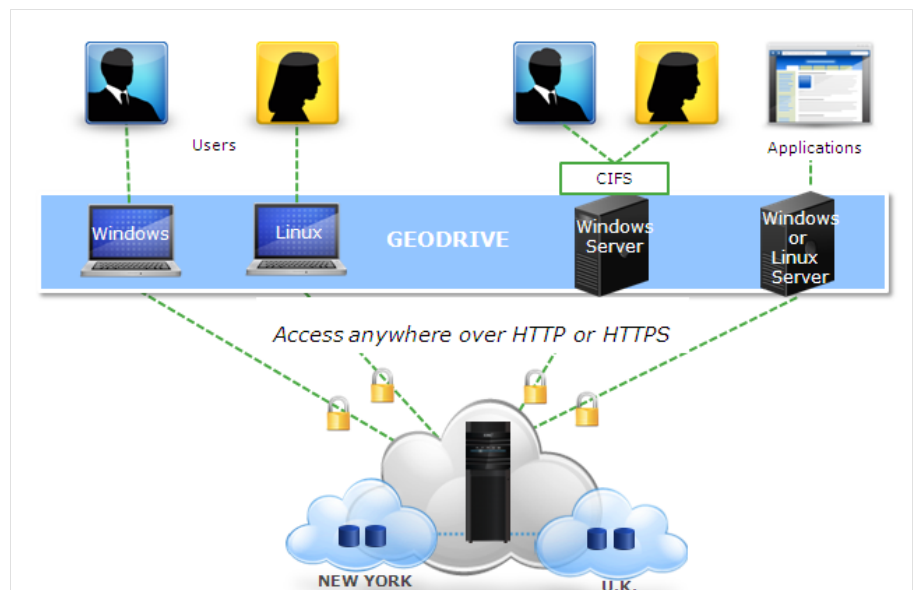

EMC Atmos is a cloud storage platform designed to manage, store, archive and access distributed unstructured data at scale. Atmos helps Enterprises and Service Providers gain operational efficiencies at scale, provides instant cloud access from any device, and can be deployed as public, private or hybrid clouds.

EMC Atmos GeoDrive is a no charge add-on software product that provides instant Windows and Linux access to any EMC Atmos storage cloud.

INSTANT WINDOWS AND LINUX ACCESS

EMC Atmos GeoDrive provides fast, simple, instant access to any Atmos cloud without having to write a single line of code. GeoDrive enables:

- Service providers to monetize and provision offerings faster - Customers can use GeoDrive to store photos, videos, documents, and music in the cloud
- Enterprises to take back control of the data center - Employees can use GeoDrive to store email attachments and Office documents in the cloud
- Application developers to get to market faster - Use GeoDrive as the target for their application to eliminate the need for developing to an API

Once installed, EMC® Atmos™ GeoDrive behaves like local storage. It creates a virtual Windows drive or Linux mount point, so users work just like they do on their local system. Users can store data copies both locally and in the cloud - or create a local shortcut to push all content to the cloud. Since it runs in your native environment, there is no learning curve, so you can be up and running in minutes.

GEODRIVE FEATURES

Installation Wizard

Install and configure in less than a minute

Broad OS Support

Microsoft Windows Enterprise (XP, SP3, Vista SP1, 7

Microsoft Windows Server (2003 SP1, 2008, 2008 R2)

Red Hat Enterprise Linux (5.5, 5.6, 6.0)

SUSE Linux Enterprise Server (10 SP3, 11 SP1)

User Interfaces

GUI and/or CLI for configuration, management and monitoring

Cache Management

Mirror: Files are sent to Atmos and maintained in local cache

Push-to-Cloud: Files are sent to Atmos and shortcuts remain in local cache

Disconnected Mode

GeoDrive can still be used even when offline or disconnected from Atmos; will sync when the connection is reestablished

Disaster Recovery

Enables file recovery from Atmos if the machine hosting Atmos GeoDrive is lost using the appropriate credentials

Advanced Options

Client-side, 256-bit AES data encryption (FIPS certified)

WAN Optimization (client-side compression occurs before encryption)

Windows 1.1 Only Features

- Gateway via CIFS
- Shareable URL
- Metadata Support
- File recovery/trash

HOW TO GET YOUR COPY OF GEODRIVE

1.) Licensed EMC Atmos customers can download GeoDrive via EMC Powerlink: <http://powerlink.emc.com/> Home > Support > Software Downloads and Licensing > Downloads A-B > Atmos Software and Virtual Edition (VE)

2.) Users who subscribe to an EMC Atmos-powered cloud storage service should contact their storage provider about Atmos GeoDrive availability and access.
